

Knots for you to use

Jansik Special is a high strength knot.

1. Put 6 inches of line through the eye of the hook.
2. Bring it around in a circle and put end through again.
3. Make a second circle, pass the end through a third time.
4. Hold the three circles of line against each other. Wrap the end three times around the circles.
5. Either hold the hook steady with pliers, or make it fast to boats rigging or safety lines.
6. Holding strain on hook, pull both ends of line to tighten.

The Palomar Knot

The Palomar Knot is a simple knot for terminal tackle. It is regarded by the International Game Fish Association consistently as the strongest knot known. Its great value is that it can safely be tied at night with minimum of practice.

1. Double about 6 inches of line, and pass through the eye.
2. Tie a simple overhand knot in the doubled line, letting the hook hang loose. Avoid twisting the lines.
3. Pull the end of loop down, passing it completely over the hook.
4. Pull both ends of line to draw up the knot.
